

L-Type Two-Way Vibratory Feeder

Brute Force, Suspension Mounted, Air Operated

The Dynamic Air L-Type Two-Way Vibratory Feeder provides instantaneous directional change of flow using two variable frequency air operated linear vibrators, specifically designed for reliability and long life.

Features:

- Total flexibility of trough and hood design
- Compact drive for mounting above or below trough
- Low cost, long lasting variable frequency air operated linear motors
- Stainless steel construction
- Suspension or base mounted isolation system
