

L-Type Vibratory Pan Feeder

***Brute Force,
Base Mounted, Air Operated, Variable Speed Compatibility***

This air operated L-Type Vibratory Pan Feeder is base mounted. It has the ability to vary the normal flow rate by 100 to 1 ratio making it ideal for high accuracy weighing and batching. Because it is

all air operated and uses compressed air and air volume for control, it does not need a motor starter or any high voltage electrical control, making it ideal for explosion-proof atmospheres.
